

ALLIEDFLEX® Technologies, Inc. introduces
Bossar BMS 2.6 PMP
Corner Spout Pouch / Fill / Seal System:

Targeted for the Personal Care Market

ALLIEDFLEX is pleased to introduce the New **BOSSAR BMS ABSOLUTE SERVO** Series featuring Corner Spout Insertion, Fill & Seal Machinery for a multitude of popular Corner Spouted Pouch Applications.

The **BOSSAR BMS 2.6 PMP model** handles pre-made "corner-cut" Standup Pouches, Inserts the Corner Mounted Spout On-Line and then automatically Fills and Seals the Pouch.

This unique approach dramatically reduces the cost of typical pre-made "pre-spouted" pouches, providing better control of supply chain and shortens lead times.

The **BOSSAR BMS 2.6 PMP** accommodates a wide range of fill volumes from 500ml - 2000ml at a rate of 20-40 PPM subject to pouch size and fill volume. Duplex (2 UP) systems are also available which double the output.

The **Bossar BMS 2.6 PMP** is ideal for providing consumers with an environmentally friendly REFILL strategy for REFILLING and REUSING their traditional plastic bottles - multiple (X) times.

The **Bossar BMS 2.6 PMP** system is also an excellent solution for the **Contract Packager** or **Pouch Converter** wanting to offer their existing clients **REFILL Pouch Supply** or **Contract Packaging Services**.

Popular REFILL POUCH Applications:

Body Wash
Hand Soap
Hand Sanitizer
Shampoo / Conditioner
Hand Soap
Dish Soap
Laundry Detergent
Fabric Softener
Household Cleaners
Automotive Lubricates
Lawn & Garden

Please see the attached Press photo.
